2<sup>nd</sup> Semester 2025-2026  
Date: \_\_\_\_\_  
Class Schedule: THU 9AM-12NN  
Instructor: Mr. Janiel P. Tagudin  
Score: \_\_\_\_\_

**I. ESSAY:** Read each question carefully, explain the trademark case between Katy Perry and Katie Perry, and analyze its implications for branding and intellectual property in Technopreneurship. (4 items, 8 points each).

*In the context of Technopreneurship, the recent trademark dispute between Katy Perry and Australian fashion designer Katie Perry highlights key issues in intellectual property, branding, and digital entrepreneurship. The designer had already registered and used her name as a fashion brand in Australia before the singer sold merchandise under the same name, leading to a legal conflict over brand ownership and consumer confusion.*

*In 2026, the High Court of Australia ruled in favor of the designer, emphasizing that trademark rights depend on actual use within a specific industry and location, not just global fame. The case shows that even well-known personalities must respect existing trademarks, and it underscores the importance for entrepreneurs to secure, protect, and clearly differentiate their brand in a competitive digital market.*

Questions:

1. How does the case demonstrate the difference between personal fame and trademark rights in business?
2. What risks do digital entrepreneurs face when building brands in a globally connected market?
3. How can IT solutions (e.g., domain management, SEO, platform verification) help prevent brand confusion?
4. What lessons can startups learn about scalability and legal preparedness from this case?
